

5 MIN GUIDE: LOW DOWN ON LOW BACK PAIN

Leading worldwide cause of work absence and disability

Considered an "epidemic" of modern society

EXPERT COMMENTARY

Dr. Anthony Delitto is well known for his contributions to physical therapy in both practice and research. He has been an active APTA member, has published over 70 articles, and is a co-author on many clinical practice guidelines, including for low back pain

John Childs, one of the cofounders of and active blogger on Evidence in Motion, actively disseminates new research and publications on important topics in physical therapy, including LBP.

DR. DELITTO:
 'I have no doubt that information about our cost-effectiveness [for low back pain]...not only would be favorably received but would more likely lead to demands for better reimbursement for our services.'

DR. CHILDS
 'Wouldn't it be nice if we had a decision-making scheme that would help us categorize patients...based on a cluster of signs and symptoms...that prompts you down a particular treatment pathway that has increased odds of success, compared to some other form of intervention.'
